

HR Onboarding System: Project Presentation Outline

This document outlines the key components of the team project presentation. It aims to provide a clear structure and ensure that all essential aspects of the project are effectively communicated to the audience.

Component 1: Project and the Team

- Project Title
- Name of the Team
- Team Members
- Date

Component 2: Project Overview

- Project Background
- Project Goal
- Target Audience

Component 3: Technology Stack

- Frontend Technologies
- Backend Technologies
- Other Technologies

Component 4: System Architecture and Workflow

- Provide a clear visual representation of the system architecture, including the frontend, backend, database, and their interactions

Component 5: Functionality Demonstration

- Ensure the demo is smooth and engaging by providing clear explanations. A rehearsal beforehand is recommended

Component 6: Project Challenges and Debugging Scenarios

- Most challenging part(s) of the project
- Debug tickets and how they were resolved

Component 7: Future Improvements

- Areas for improvement from this sprint

Component 8: Q&A

- Allow time for a Q&A session with the audience
