

AWS Management Console

AWS Management Console

- <https://aws.amazon.com/console/>
- “Everything you need to access and manage the AWS Cloud — in one web interface”
- Log in with your AWS user credentials

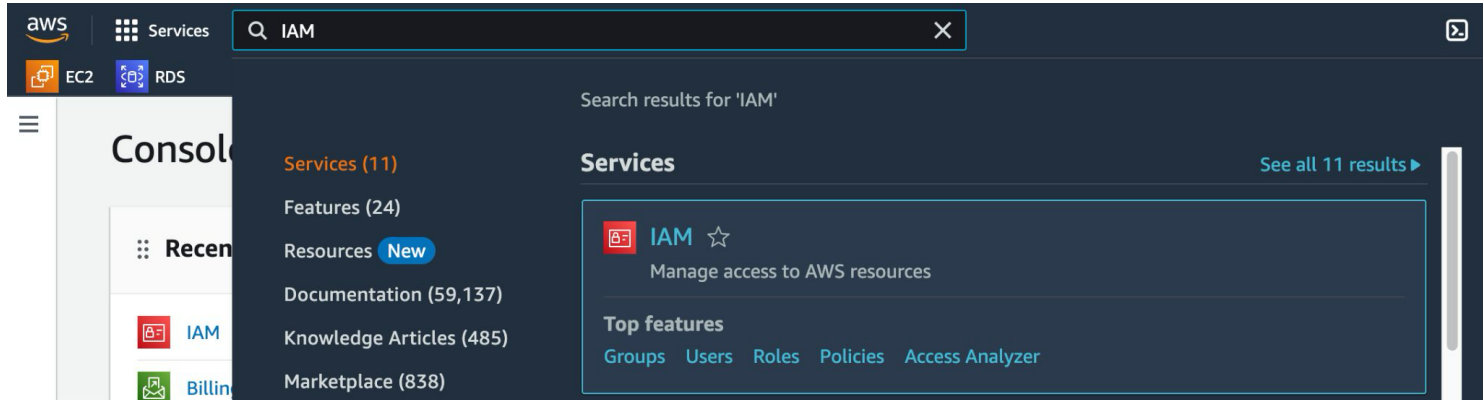

Home Page

- Here's the layout of the home page

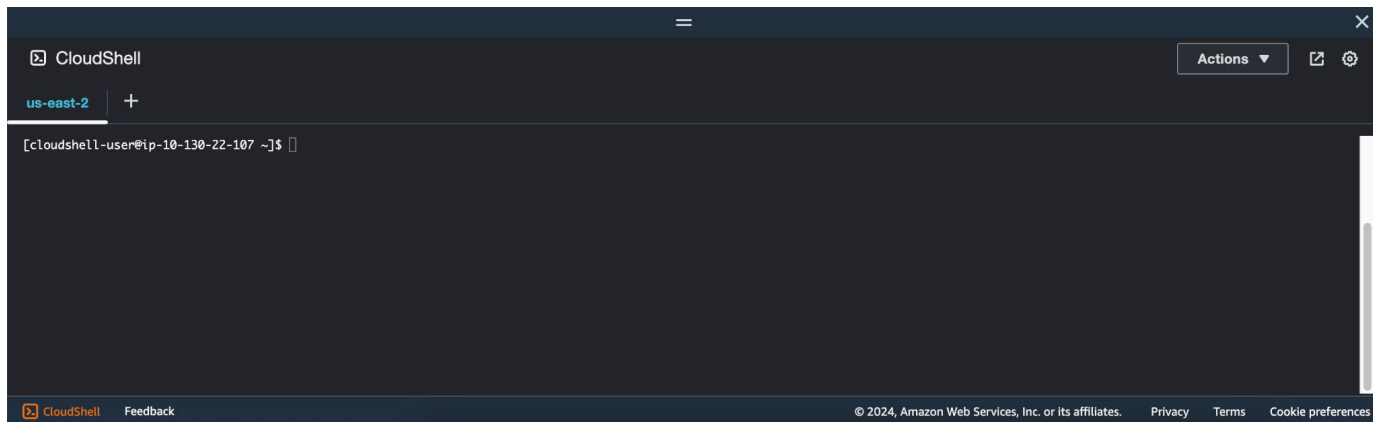

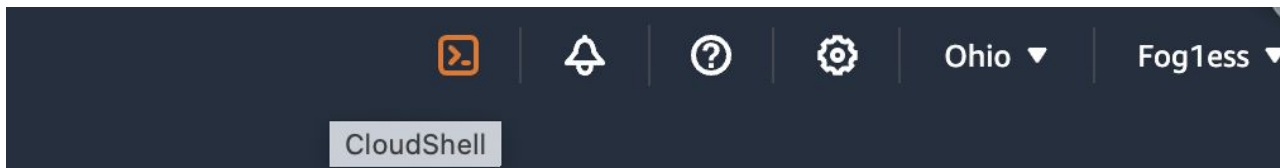

Nav Bar

- Some important functionalities reside here
 - Search specific Service (IAM, RDS, EC2, DynamoDB, etc.)

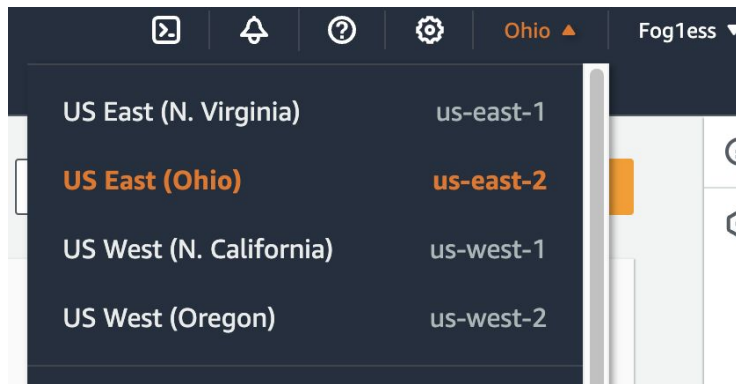

2. Enter the AWS CloudShell to send commands

3. See the current **region**

- Most of the Services are region-based, please make sure your group members are using the same one
- Some services (e.g., IAM) is global. If you enter IAM Dashboard, you will see “Global in the upper right corner”.

AWS IAM

Suggested AWS IAM Practice

- One AWS Account for the whole group, different IAM users for each member
- Please make sure you are using the free tier, and keep monitoring the cost by **Billing and Cost Management**.

IAM Dashboard

- You can see the overall stats here.
- On the left side, you can do some operation, like manage users, user groups.
- Team lead (or someone with AWS Experience) holds the AWS account. They can create some IAM users for each team member, and add MFA for better security.

The screenshot displays the AWS IAM Dashboard interface. The top navigation bar includes the AWS logo, a 'Services' menu, a search bar, and a '[Option+S]' shortcut. Below the navigation bar, the left sidebar shows the 'Identity and Access Management (IAM)' section with a search bar and a list of links: 'Dashboard', 'Access management' (with sub-links for User groups, Users, Roles, Policies, Identity providers, and Account settings), and 'Access reports' (with sub-links for Access Analyzer, External access, Unused access, and Analyzer settings). The main content area is titled 'IAM Dashboard' and features a 'Security recommendations' section with a red notification icon. This section contains two items: 'Add MFA for root user' with a warning icon and an 'Add MFA' button, and 'Root user has no active access keys' with a green checkmark icon and a note about using access keys. Below this is the 'IAM resources' section, which shows a table of resources in the AWS Account:

User groups	Users	Roles	Policies	Identity providers
0	0	2	0	0

On the right side of the dashboard, there is an 'AWS Account' section displaying the Account ID (891377292568), Account Alias, and a 'Create' link. Below this is a 'Quick Links' section with a link to 'My security credentials' and a description: 'Manage your access keys, multi-factor authentication (MFA) and other credentials.'

Other AWS Services

- Please do some research to find tutorials for the services you are going to use.
 - E.g. RDS - create a DB instance in free tier
 - Official Documentation: <https://docs.aws.amazon.com/>
